The Venue

The Manchester Surgical Skills and Simulation Centre has a unique integrated operating theatre environment with nine training stations featuring the latest in audio-visual technology and instrumentation made by world-renowned medical equipment manufacturers – identical to those you will find in the most advanced operating theatres in the world.

Testimonials

- * Good CPD points, Good discussion at the end of course. Fantastic Faculty
- * I feel the course was excellent both in the educational content, hands-on dissection, facilities and discussion. The variation in opinion as to each procedure reflected individual experience. I feel this should be strongly supported and 'badged' by BAOMS.
- * Overall a very good course, May be time for demonstration from faculty would be good. I liked that there was time for flexibility so we could explore areas we liked or wanted to know more about. I would recommend it to others.
- * Overall an excellent course. Very good value for money. Excellent Faculty, Good facilities, Very highly recommended.

Aim of the course

The intention of this 3 day hands-on cadaver course is to teach surgical anatomy and the techniques for the commonly used facial cosmetic procedures. It is suitable for senior trainees and consultants.

The dissection is performed on fresh frozen cadavers and allows each candidate to perform operations in an ideal setting.

A maximum of two candidates will be allocated to each cadaver.

The emphasis is placed on the 'hands-on' exercise. This will be demonstrated in a step-by-step explanation of several techniques prior to the operation.

The hands-on exercises are demonstrated in a well supervised environment by internationally renowned surgeons.

There will be opportunity to debate with the faculty and other delegates contentious issues in cosmetic surgery.
