

**Facial Aesthetic Surgery**  
**(Fresh Cadaver Dissection Course)**

**20-22 October 2011**

**Ljubljana, Slovenia**

The intention of this 3 day hands-on cadaver course is to teach candidates the basic surgical techniques of facial cosmetic surgery and to familiarise the basic anatomy of the face for aesthetic procedures.

The dissection is performed on fresh frozen cadavers and allows each candidate to perform operations in an ideal setting.

A maximum of two candidates will be allocated to each cadaver.

The emphasis is placed on the 'hands-on' exercise. This will be demonstrated in a step-by-step explanation of several techniques prior to the operation.

The hands-on exercises are demonstrated in a well supervised environment by internationally renowned surgeons.

Course participants will receive a DVD of cosmetic facial surgery techniques as part of their educational program.

**Thursday, 20 October 2011 – registration at 08.30**

	<b>Introduction</b>	Mr V Ilankovan
	Pre-operative assessment Medication Tumescent solution Consent Dressing Patient preparation	Mr V Ilankovan
