

Fresh Cadaver Dissection Course

Venue: Manchester Surgical Skills & Simulation Centre

The intention of this 3 day hands-on cadaver course is to teach surgical anatomy and the techniques for the commonly used facial cosmetic procedures. It is suitable for senior trainees and consultants.

The dissection is performed on fresh frozen cadavers and allows each candidate to perform operations in an ideal setting.

A maximum of two candidates will be allocated to each cadaver.

The emphasis is placed on the 'hands-on' exercise. This will be demonstrated in a step-by-step explanation of several techniques prior to the operation.

The hands-on exercises are demonstrated in a well supervised environment by internationally renowned surgeons.

There will be opportunity to debate with the faculty contentious issues in cosmetic surgery
